DUN & BRADSTREET CREDIT EXCELLENCE CERTIFICATE

In business world, the Dun & Bradstreet Certificate of Credit Rating Excellence is recognised as a proof of above-average quality of the company's business operation. Based on the real-time information on business operation and the data from previous years, the Certificate is awarded for a period of the next 12 months from the date of the issue. Dozens of statistically significant variables, verified formulas that are based on the financial data, blockings, payment habits, and lawsuits prove security, competitiveness, constancy, stability, exemplary attitude, and reliability of business entities. The higher the Credit Excellence Certificate, the higher the trust and reputation in the market.

Credit rating excellence = safety, excellence and effectiveness

With the internationally established practice of certification, business entities strengthen their reputation and additional trust in both domestic and foreign business environment. Dun & Bradstreet Certificate of Credit Excellence does not only reflect more than a year old company's financial image, but also includes a wide range of **statistically relevant** and **current data on trends**, which use advanced analytical algorithms to reflect the probability of company's success/failure.

Certificates for the following 12 months predict **protection** against deletions or insolvency, compulsory settlement or liquidation, deletion from the business register and blocking of the entity's transaction accounts. Business excellence is also a message for business environment on **good** financial results, **sustainability** and **stability**, since it is a proof of continuous flawless operations, as well as **excellence** and **reliability** due to good payment discipline.

Tradition and professionalism: four modules

Dun & Bradstreet has a long tradition in awarding certificates of credit excellence in the European market. The evaluation module consists of four modules:

Demographics module. It includes profile data, such as age, region, municipality, type and activity of the subject (LLC, PLC, sole proprietorship or cooperative), number of employees, lawsuits and the number of opened and closed accounts in the past year.

Financial module. It covers the items of the balance sheet, profit and loss account and selected indicators and their trends as variables, which are statistically significant for company's operations and predictions of losses.

Payment habits. It takes into account and detects the time-weighted payment discipline, share of advance payments and share of longer payment delays according to the information supplied by the partners of the company.

Blocking. This module includes the data on blocking for the past 365 days and automatically eliminates business entities upon detection.

Balance sheet: optimality

These indicators represent the central part of the credit rating system, which is the basis for the **rating classes** (A, AA, AAA). The key factors also include the trends during the year, as the model detects **fluctuations**, which are alleviated with increased efficiency and reduced risk by the best business entities. Accordingly, the certificate of business excellence also guarantees **optimality of business**.
